The global Polycarbonate Diol market was valued at 17.2 Million USD in 2021 and will grow with a CAGR of 3.01% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Polycarbonate diol (PCD) is a kind of polyol chemical materials, with two ends -OH functional group molecular, and molecular weight ranges from hundreds to thousands. Its molecular chain contains aliphatic alkyl and carbonate repeat unit, chemical property resembles aliphatic polyester and polyether polyol rather than general polycarbonate materials. Polycarbonate diol usually used for the synthesis of urethane resin, acrylic resin, polyester resin and other materials. It can also be used as polyurethane-based coating formulations synthetic leather, inside decorative material of the car, smart phone, computer and other products, providing an extreme durability and a high performance to the final polymer. Polycarbonate diol is an intermediate used in high-performance polyurethanes (PUs). It is increasingly well-known and used for a wide range of polyurethane coatings, adhesives and elastomers. Globally, the polycarbonate diol market is mainly driven by growing demand for polyurethane elastomers, which accounts for nearly 42.63% of total downstream consumption of polycarbonate diol in global. Due to technical barriers, the polycarbonate diol industry has a rather high dispersion. Around 76% of the market share is covered by the four leading player named UBE Chemical, TOSOH, Bayer and AsahiKASEI. Ube Industries set up

polycarbonate diol facility in Thailand that started production in 2015 and AsahiKASEI built polycarbonate diol plant in China which it markets as Duranol in 2013.
