The global Polyester Plasticizers market was valued at 380.37 Million USD in 2021 and will grow with a CAGR of 3.42% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Polyester plasticizer is a linear high-molecular polymer, usually using dibasic acid and diol as raw materials, first esterified and then polymerized, and the molecular weight range is mostly between 800-8000. Because of good resistance to oil and great migration-resistance to PS and ABS plastic, polyester plasticizers are often used in non-migrating wire jackets/insulation, adhesive tapes, gaskets, tapes or oil-resistant pipes or gloves. In addition, they can be used for rubber. Global Polyester Plasticizers Application segment consists of PVC Products, Rubber Products and Others. Same as traditional plasticizer, PVC Products was estimated to account for a sales share of 87 % in 2020. The Key players operating into Global Chloroquine Phosphate Market are DIC Corporation, UPC Group, Polynt Group, Eastman and Adeka, etc. DIC Corporation and UPC Group are the two players with the largest sales share, occupying 15.61% and 14.33% of the market share in 2019, respectively.
