Polyether ether ketone (PEEK) is a semi-crystalline high temperature thermoplastic that offers a unique combination of exceptional performance characteristics. PEEK has excellent long term chemical resistance and also offers thermal and mechanical properties. PEEK is used to make some specialized components, which are used in their various applications. PEEK has excellent strength, rigidity and toughness at elevated temperatures, chemically resistant to most common solvents, has low moisture absorption, superior electric properties, with FDA compliant, and relatively low smoke and gas emissions. In consumption market, the global consumption value of polyetheretherketone (PEEK) increases with the 11.52% average growth rate. Europe and North America are the mainly consumption regions due to the bigger demand of downstream applications. In 2015, these two regions occupied 55.88% of the global consumption volume in total.
