The global Polyisobutenyl Succinic Anhydride (PIBSA) market was valued at 130.33 Million USD in 2021 and will grow with a CAGR of 2.58% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Polyisobutenyl succinic anhydride (PIBSA) is lubricant additive intermediate which can further react to provide functional and performance products used in the oil, fuel, lubes, mining, coatings, personal care, pigments, dyes and polymers sectors. It can be prepared by the reaction of polyalkenes, generally polyisobutene, with maleic anhydride. The world polyisobutenyl succinic anhydride (PIBSA) consuming market will still has a certain amount of growth. The growth rate will increase at a growth rate of about 3%. Global consuming market will still has a certain amount of growth and the main consumption region will still be in USA, China, and Europe. From the current situation, the Chinese technical and technological far behind the other manufacturers, so there is a gap in terms of cost control, which makes domestic manufacturers margins lower than foreign manufacturers, on the other hand, take additive industries for example, most domestic manufacturers sell raw materials or downstream PIBSA single dose, but foreign manufacturers rarely sell PIBSA or PIBSA-based single dose, they sell complexion agent products based on PIBSA, and therefore has a better profit margins.
