Abstracts

The global Polymer Bearing market was valued at 7760.06 Million USD in 2021 and will grow with a CAGR of 2.45% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Plastics offer many advantages over other common bearing materials. Plastics are extremely corrosive resistant and most are chemically resistant. Plastic bearings do not transfer heat to other areas of the mechanical assembly. Many plastics are even self-lubricating and therefore eliminate the possibility of failures from lack of maintenance. The Asia-Pacific region led the global polymer bearing market in 2017, owing to the rise in demand for polymer bearings from varied end-use industries such as automobile, textile, food processing, medical & pharmaceutical, packaging, and chemical in this region. China, India, and Japan are leading countries in terms of production and consumption of polymer bearings in the Asia-Pacific region. Moreover, the easy availability of raw materials and labor is further anticipated to drive the growth of the polymer bearing market in the Asia-Pacific region.
