Polymer bonded magnet refers to a kind of magnet made by mixing magnetic powder with certain permanent magnetic properties and a certain proportion of binder and following a certain molding process. If an orientation magnetic field is applied during the molding process so that the easy magnetization directions of the magnetic powder are in the same direction in the magnet, this is an anisotropic bonded magnet, otherwise it is an isotropic magnet. There are various methods for forming bonded magnets, the most important of which are injection molding and compression molding. China is the world's largest manufacturer of polymer bonded magnets, with a market share of over 40%. Leading companies in the market include Galaxy Magnets, Zhongke Sanhuan, Daido Electronics, and Magnequin. Etc.
