The global Polymer Dispersed Liquid Crystal (PDLC) Film market was valued at 80.52 Million USD in 2021 and will grow with a CAGR of 21.96% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Polymer-dispersed liquid crystals (PDLCs) are a relatively new class of materials that hold promise for many applications ranging from switchable windows to projection displays. These materials, which are simply a combined application of polymers and liquid crystals, are the focus of extensive research in the display industry. Polymer Dispersed Liquid Crystal (PDLC) are a type of smart film that change their transparency in response to an electrical impulse. When inactive the liquid crystals are randomly arranged, thus scattering the light as it permeates the screen, which results in the translucent, milky appearance of the assembly. However, a voltage is applied, an electrical field is created between the two electrodes, which causes the liquid crystals to align, allowing light to pass through and essentially turning the screen transparent. Global Polymer Dispersed Liquid Crystal (PDLC) Film key players include DM Display, Unite Glass, Polytronix, etc. Global top three manufacturers hold a share nearly 35%. Asia Pacific is the largest consumption country of polymer dispersed liquid crystal (PDLC) film in the world in the past few years and it will keep the same position in the next few years. Asia Pacific market took up about 55% of the global market in terms of consumption, followed by North Americas (about 21%), Europe is followed with the

share about 15%. Polymer dispersed liquid crystal (PDLC) film is mainly classified into two types: Non-adhesive PDLC Film and Self-adhesive PDLC Film. And Self-adhesive PDLC Film is the most widely used type which takes up about 58% of the global total. And in terms of application, the largest application is Building Materials, followed by Transportation Industry, etc.
