Abstracts

The global Polymer Emulsions market was valued at 300.9 Million USD in 2021 and will grow with a CAGR of 4.56% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Polymer Emulsions are monomers dissolved in water. They are also known as waterborne solvent because of their high water content. They are one of the fastest growing categories of specialty chemicals in the world. Polymer Emulsions have superior usability and safety standards. Polymer emulsions also have better recyclability and lifespan when compared to solvent-borne polymers. Key product classifications include acrylics, SB latex, polyurethane dispersions and vinyl acetate polymers. Among these, acrylics segment dominates with over 36% share in 2015, and the vinyl acetate polymers occupies for approximately 24%, the SB latex for approximately 16%. Paints & coatings have emerged as the dominant application over the recent years, with over 44 % market share. Such robust growth rate is a result of increasing acrylics usage in the paints & coatings industry. Regulatory framework favoring environment friendly applications with low VOC content is a key driver for this application. Geographically, Asia pacific emulsion polymer market has been the largest regional consumer, followed by Europe and North America. Rapid industrialization, urbanization and massive construction spending initiatives are the key factors behind such dominance and growth opportunities. China and Japan are the two largest consumers in Asia, and

simultaneously China is the second producer in 2015. North America and Europe are projected to witness moderate growth in the near future. Other regions such as Latin America and Middle East & Africa are expected to witness stable market growth over the forecast period.
