The global Polymeric Flexible Tubing market was valued at 7399.03 Million USD in 2021 and will grow with a CAGR of 3.64% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Polymeric Flexible Tubing are made from elastomeric and non-elastomeric polymers that can be natural or synthetic. The focus is on thermosetting elastomers, natural and synthetic rubbers and thermoplastic tubing materials, which include plastic resins and TPEs. This report is devoted exclusively to flexible tubing used for materials transport. Tubing that transports fluids and other materials not generally considered to be part of the traditional markets for tubing are outside the scope of this study. Products such as core tubes for paper-towel and tissue products, fiber tube packaging for juice concentrates and other food and beverage products, toothpaste and other product packaging tubes and drinking straws are also outside the scope of the study. In addition, structural and fabrication tubing as well as decorative tubes are also outside the scope. As noted at the beginning of this chapter, this is a study of flexible tubing produced from polymeric materials. The report does not cover rigid plastic pipe and tubing or metal pipe and tubing. Global Polymeric Flexible Tubing main providers include Saint-Gobain, Eaton and Parker Hannifin, totally accounting for over 10% of the market. Asia-Pacific is the largest market, with a share over 36%. As for the types of products, it can be divided into Rubber Flexible Tubing, PVC Flexible Tubing,
