Abstracts

The global Polytetrahydrofuran (PTMEG) market was valued at 3230.79 Million USD in 2021 and will grow with a CAGR of 1.39% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Polytetrahydrofuran (PTMEG) is a type of polycol prepared from tetrahydrofuran (THF) with the repeat unit $[-CH_2(CH_2)_3O-]$. It is easily soluble in alcohols, esters, ketones, aromatic and chlorinated hydrocarbons, and insoluble in fatty hydrocarbons or water, white waxy solid at room temperature, when the temperature exceeds room temperature, it becomes transparent liquid. When its molecular weight increases, its solubility drops. At room temperature, PTMEG is a good absorbent of water up to its molecular weight or maximum up to 2%. First, the polytetrahydrofuran (PTMEG) industry concentration is not high; there are less than 50 manufacturers in the world, and high-end products are mainly from America, Germany, Taiwan and Japan. In the world wide, giant manufactures mainly distribute in American, Taiwan and Europe. America and Germany have long history and unshakable status in this industry. In China, the manufactures focus in Jiangsu, Shanxi and Zhejiang province. Second, many company have several plants, usually close to aimed demand market. There are international companies setting up factories in China too. Some companies usually take a joint venture enter into aim market, like BASF who takes their advantage merge with Markorchem, who is located in Southwestern of China. Third, all manufactures in the

world are committed to the improvement of product. These two years, some of Chinese manufactures can almost catch up with the world's leading technology too. Fourth, the import and export percent of this industry is not high. Because many international manufactures expand their business through building factories or investments. Fifth, company mergers and acquisitions, and inter-companies cooperation have occurred for development and growth. As the downstream consumption usually follows with developed and rapid economic growth areas, such as BRICS, the developed areas` company prefers investing to underdevelopment regions these years. Sixth, this industry is affected by the economy and policy, so it`s important to put an eye to economic indexes and leaders` prefer. With the global economic recovery, more and more people pay attention to rising environment standards, especially in underdevelopment regions that have a large population and fast economic growth, the need of polytetrahydrofuran (PTMEG) will increase. Seventh, we tend to believe this industry now is close to mature, and the demand increasing degree will show a smooth curve. On product prices, the slow downward trend in recent years will maintain in the future, as competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin.
