Potassium acetate (KCH_3COO) is the potassium salt of acetic acid. It is white flakes or crystalline powder and also used in industry, pharma, food additives, deicing, and others. Potassium salts are common to be sold in aqueous solution form.

Correspondingly, potassium acetate is usually sold as aqueous solution, especially in deicing and drilling fluid industries. In our report, the amount of all liquid products is converted to amount of pure solid potassium acetate. Niacet is the global leader in Europe, with 8.95% of the global potassium acetate production. Cryotech and Hawkins are leading manufacturers in USA. Market in China is more separated, compared with USA and Europe. Potassium acetate product is usually sold in aqueous solution and powder form. USA and Canada are the main import regions of potassium acetate. China and Europe are the main export areas of potassium acetate. For demand market of potassium acetate, there is also a certain space in the next few years. China is the main export area, where potassium acetate is mainly exported to USA. Potassium acetate is used in a wide variety of industrial applications. The major uses are in the production of catalyst, oil drilling, pharma & food and deicing, etc. Deicing is the main application of potassium acetate, accounting 64.52% of the global consumption, while

deicing is the major application of potassium acetate in North America.
