Converters and inverters are electrical devices that convert current. Converters convert the voltage of an electric device, usually alternating current (AC) to direct current (DC). On the other hand, inverters convert direct current (DC) to alternating current (AC). In the coming years there is an increasing demand for Power Converter/Inverter in the regions of North America and Europe that is expected to drive the market for more advanced Power Converter/Inverter. Increasing of metalworking field expenditures, more-intense competition, launches in introducing new products, increasing of spending on nonclinical field industry, retrofitting and renovation of old technology, increasing adoption of Power Converter/Inverter will drive growth in Asia markets.
