The global Power Over Ethernet (POE) Controllers market was valued at 19.75 Million USD in 2021 and will grow with a CAGR of 3.39% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

POE Controllers encompass a wide variety of Power Sourcing Equipment (PSE) and Powered Device (PD) controllers. POE, as a mature technology, allows power to be managed and transferred between PSEs and PDs over low-cost Ethernet cables, thereby avoiding costly AC outlet installations and running power cables. Global production is mainly concentrated in USA accounting for 74% in 2016, followed by Europe with share about 13%. Global consumption are mainly concentrated in USA, Europe, Japan, respectively with share of about 34%, 25%, 15% in 2016. There are enormous market space and potential in the coming years. However, we suggested that the obtaining of core technology is necessary for entering this market, because for now core technologies are dominated by developed countries.
