The global Powered Catamaran market was valued at 115.25 Million USD in 2021 and will grow with a CAGR of 4.39% from 2021 to 2027, based on HNY Research newly published report.

Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Catamarans are multi-hulled boats and are considered as luxury cruising yachts. Catamarans offer multiple advantages such as enhanced stability, speed, and maneuverability over other marine alternatives such as boats, yachts, and monohulls. This has led to high adoption of catamarans for various applications including sports and recreational purposes. The average speed of catamarans is 300 nautical miles (560 km) per day, which can be as much as 400 nautical miles for sporting events. Catamarans provide ample space, improved stability, due to support from two hulls, high speed, level sailing due to lack of heeling, and safety. This are among the major benefits that has in turn, led to growth of the market over the forecast period (2018-2025).
