## Abstracts

The global Precision Link Conveyors market was valued at 44.64 Million USD in 2021 and will grow with a CAGR of 8.77% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Precision-link conveyors index components with high accuracy, speed, and quality to give manufacturers a way to make assemble, mark, weld, and manufacturing operations more efficient. Precision link conveyors are designed to run high-volume manufacturing to millions of cycles without intensive maintenance. Typical maintenance involves tension checks and adjustments of the chain and cleaning of the conveyor if it runs in a dirty environment. Precision-link conveyors are unsuitable for feeding parts to a line, where a process is not being done on them. This is because their accuracy is not required. Similarly, due to their cost, they're also inappropriate where application accuracy isn't critical. Global Precision Link Conveyors main manufacturers include DESTACO(Dover Corporation), CDS(Bettinelli) and ITALPLANT srl, totally accounting for 75% of the market. North America is the largest market, with a share over 40%. As for the types of products, it can be divided into carousel conveyors and over-under conveyors. The most common type is carousel conveyors, with a share over 52%. In terms of application, it is widely used in industrial field and consumer goods. The most common application is industrial field, which accounts for 83% of all.
