## Abstracts

The global Private Submarines market was valued at 93.09 Million USD in 2021 and will grow with a CAGR of 5.6% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A private submarine or personal submarine is a submarine, usually privately funded and constructed, which is usually primarily intended for recreational use. Private submarines are phenomenally expensive, so while dozens or hundreds of private submersibles are bobbing around the deep, there are currently no private luxury subs in existence.
