The global PVD Coating Machine market was valued at 2961.21 Million USD in 2021 and will grow with a CAGR of 4.04% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

PVD, physical vapor deposition, is an advanced surface treatment technology widely used in the world. Its working principle is in the vacuum condition, the use of gas discharge gas or vaporized material part of the separation, in the gas ion or by the vaporized material ion bombardment action at the same time the vaporizer or its reactants deposited on the substrate. It has the characteristics of fast deposition speed and clean surface, especially has the advantages of strong film adhesion, good winding, wide range of plating materials. Globally, the industrial market concentration of PVD coater is low, because the manufacturing technology of steam trap is relatively mature compared with some high-tech equipment. Some companies, such as ULVAC, Applied Materials, Otorun and Buhler Leybold Optics, are known for their outstanding performance in PVD coater products and related services. ULVAC ranks no. 1 in the global PVD coater market in terms of revenue share, with German, American and Japanese manufacturers dominating the high-end market. Chinese manufacturers are struggling to capture market share. This market has witnessed significant growth owing to increased usage in electronics and panel Display Industry, optics and glass Industry and automotive applications. Increased investment in PVD coating equipment by

leading players is expected to favorably impact market growth over the forecast period. The Asia Pacific is expected to be the fastest-growing market over the forecast period owing to extensive usage in the industrial field. ULVAC, Applied Materials and Oporun are the leader companies in the world.
