Quartz counters are made from either a natural slab that has been polished or engineered quartz composite. Pure, natural slabs are very expensive and are therefore quite uncommon as countertops. The engineered type is made of 93 to 97 percent ground quartz combined with resins, binders and pigments. This combination is poured into molds and allowed to harden, then finished into the shape and style desired. This type of counter is much more affordable and common than the natural slab. Kitchen Countertops is a major application of Quartz, in 2017, the Quartz consumption (sales) in Kitchen Countertops was 27735 K Sq.m, and it will reach 61841 K Sq.m in 2024; while the sales market share in Kitchen Countertops was 51.70% in 2017 and will be 53.47% in 2024.
