The global Reach Stacker market was valued at 3.98 Million USD in 2021 and will grow with a CAGR of 4.01% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A reach stacker is a vehicle used for handling intermodal cargo containers in small terminals or medium-sized ports. Reach stackers are able to transport a container short distances very quickly and pile them in various rows depending on its access. Reach stackers have gained ground in container handling in most markets because of their flexibility and higher stacking and storage capacity when compared to forklift trucks. Using reach stackers, container blocks can be kept 4-deep due to second row access. The Europe is the largest market for Reach Stackers, followed by USA with respective volume shares of 40.95% and 26.28% in 2015. Europe is the largest regional market with 37.93% of global market volume, followed by Asia Pacific and North America. From 2010 to 2015, Asia Pacific was the fastest-growing region with China and India driving expansion. From the view of application market, 51.66% is the most active and potential field because of the widely use of Intermodal Freight Transport in 2015. Although there is big difference between big companies such as Kalmar with new companies, especially in the price of products, customers still willing to pay more money to achieve products or service with higher quality. Therefore, it will become harder and harder for a new company which doesn't have its own core technology and R&D team to survive in

this technology-intensive battle. For the forecast period 2016-2021, China will record faster-than-average annual growth rates of 11.23% in Reach Stackers. North America, Western Europe and Japan are relatively mature markets and are forecast to show below-average growth for transparent barrier film during the forecast period.
