The global Reactive Alumina market was valued at 835.67 Million USD in 2021 and will grow with a CAGR of 5.68% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Reactive Alumina is a form of aluminum oxide that is very porous and bonds with certain liquids and gases without its chemical or physical form changing. Due to its high porosity, it has a high ratio of surface area to weight. It is commonly used as a desiccant, for water treatment, and as a catalyst in natural gas and refining operations. In this study, the market for the Reactive Alumina consumption divided into five geographic regions. North America Reactive Alumina market size was valued at USD 336.4 million in 2018, followed by Asia-Pacific and Europe. Our analysts estimate that The Asia Pacific region is projected to witness growth to the tune of 6.35% during the forecast period. This growth can be primarily attributed to the growing demand for clean water sources, for catering to the needs of the rapidly growing population as well as industrial sectors in the region. This region accounts for a market share of nearly 32% by 2024.
