Reclosable Fasteners offer advanced closure alternatives to zippers, screws, snaps, hooks, etc. Reclosable Fasteners commonly consists of two components: typically, two lineal fabric strips (or, alternatively, round 'dots' or squares) which are attached (sewn or otherwise adhered) to the opposing surfaces to be fastened. The first component features tiny hooks, the second features smaller loops. When the two are pressed together the hooks catch in the loops and the two pieces fasten or bind temporarily. When separated, by pulling or peeling the two surfaces apart, the strips make a distinctive 'ripping' sound. Reclosable Fasteners industry is relatively scattered. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top six producers account for about 47 % of the revenue market.
