Recycled plastics are the plastics that made from post-consumer or post-industrial plastics instead of the virgin resin. The process of recycling used plastic from consumable products is an efficient means to reprocess the material into useful products. Many different products make great sources of recyclable material, including: soda bottles, plastic packaging, sheets and pellets. Recycled plastic is used to make many different types of products. The type of product that is made out of recycled plastic depends on the type of plastic resin. There are several different types of plastic resin used to make different products, such as PET, PP, HDPE and LDPE. Recycled plastics can be used in various fields, like Packaging, Construction, Textile Fiber / Clothing, Landscaping / Street Furniture, etc. Packaging is the largest application of recycled plastics with market share of 45.98% in 2016.
