The global Residential Smoke Alarm market was valued at 2137.69 Million USD in 2021 and will grow with a CAGR of 4.17% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Smoke alarm, another name for smoke transducer, smoke sensors, etc. It is a device that detects smoke, typically as an indicator for fire. It can be used for fire prevention system, security system and other fields to detect fires before they become dangerous and to provide sufficient warning to occupants so they can escape. Smoke alarm was first used to space equipment. Later they are used in home and factories and other fields. As for the United States residential smoke detector market, it will still show optimistic trend, and technological trends in the market will shift dramatically. Integration of detectors into the smart home will be an opportunity for installers in this market, such as integration with home energy management systems. Smart sensor vendors, like Birdi, Roost and Halo will ship their products in the second half year of 2016. In West Europe, many countries have submitted new smoke detector regulations in recent year. For example, the greater part of Austria, the whole of France and many German states building regulations are updated this year to oblige smoke detectors in all homes, because warning about smoke or fire is offered by using Smoke detectors. In France, smoke detectors are mandatory in all homes from 8th March 2015. In Germany this regulation is called ?Rauchmelderpflicht? (mandatory smoke detectors) for private

homes. This obligation is currently different for the states Bavaria, Baden-Württemberg and North-Rhine-Westphalia. In the future, this trend may be transformed to East Europe countries, and the consumption of smoke alarm will be showing an upward tendency.
