Abstracts

The global RFID Reader market was valued at 152.12 Million USD in 2021 and will grow with a CAGR of 15.38% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

An RFID reader, also known as an interrogator, is a device that provides the connection between the tag data and the enterprise system software that needs the information. The reader communicates with tags that are within its field of operation, performing any number of tasks including simple continuous inventorying, filtering (searching for tags that meet certain criteria), writing (or encoding) to select tags, etc. The reader uses an attached antenna to capture data from tags. It then passes the data to a computer for processing. Just like RFID tags, there are many different sizes and types of RFID readers. Readers can be affixed in a stationary position in a store or factory, or integrated into a mobile device such as a portable, handheld scanner. Readers can also be embedded in electronic equipment or devices, and in vehicles. The Major regions to produce RFID Reader are North America, Europe and China. North America is the largest production in volume (production share 39.30% in 2016). RFID Reader is mainly produced by Honeywell, Datalogic and Zebra. And these companies totally occupied above 41.52% market share by sale value in 2016. Along with the automotive production and ownership, North America, EU, Asia-Pacific are major consumption regions in RFID Reader market. The largest consumption region is North America,

accounting for 35.52% market share in 2016 by consumption volume. Asia-Pacific is a promising region to be the fastest developing consumption region in the next few years. Although sales of RFID Reader brought a lot of opportunities, the industry barrier is rather high and the automotive industry supply chain is rather closed. Therefore, the study group recommends the new entrants who just having money but without technical advantage and downstream support, do not to enter into the RFID Reader field hastily.
