A roof window is an outward opening window that is incorporated as part of the design of a roof. Often confused with a skylight, a roof window differs in a few basic ways. A roof window is often a good option when there is a desire to allow both light and fresh air into the space. A roof window tends to be larger than a skylight, making it possible to enjoy a wider view of the sky overhead. In addition, skylights are usually stationary; that is, they cannot be opened and closed. With some designs of a roof window, it is possible to retract a portion of the glazed panes to allow in fresh air as well as enjoy the natural light. In the coming years there is an increasing demand for roof windows in the regions of America and Asia Pacific that is expected to drive the market for more advanced roof windows. Growth in government budgets in the construction fields expenditures, more-intense competition, launches in introducing new products, retrofitting and renovation of old technology, increasing adoption of roof windows will drive growth in America and Asia Pacific markets.
