## Abstracts

The global Rugged Handheld Device market was valued at 322.61 Million USD in 2021 and will grow with a CAGR of 2.34% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Ruggedized handheld devices (smartphones and readers/scanners) are smaller (5-7 inches screen size) than a tablet and a laptop. These devices withstand difficult climatic and environmental conditions. Rugged handheld devices have a battery life of more than 10 hours. They are lightweight and offer faster navigation through a touchscreen than a keyboard or a mouse. The rugged handheld devices are used for reports writing, communicate with peers, conduct surveillance, and analyse databases. The rugged handheld device industry concentration is relatively high, and big producers are mainly from U.S. and Western European. The key consumption markets locate at developed countries. North America takes the market share of 28.4%, followed by Europe with 19.9% in Y2017. Global consumption market has a quicker growing speed of CAGR 6.3% from 2017 to 2023. We tend to believe this industry becomes more and more mature, and the consumption increasing rate will show a smooth curve.
