Safety light curtains are usually installed away from the points of hazardous operation. These curtains are mainly deployed to prevent injuries and other occupational hazards in industrial settings. These light curtains detect the entry of people or workers into a hazardous area and automatically trigger the shut down the machinery. APAC is expected to hold the largest share of the safety light curtain market by 2023. APAC comprises countries such as China, Japan, India, and South Korea. China is among the fastest-growing economies in APAC, and also is one of the biggest manufacturing hubs in the region. China specializes in the mass production of almost every product catering to industries such as automotive, semiconductor, electronics, chemicals, food & beverages, and healthcare, followed by India, which is also a major economy in APAC. Japan is a smaller country with respect to land size, but is responsible for huge production output and energy consumption. South Korea has vast automotive and semiconductor manufacturing industries. These factors are driving the growth of the safety light curtain market in APAC.
