Samarium is one rare earth element, from the mineral. Samarium, atomic no. 62, symbol Sm, weight at 150.36. It is a silvery-white metal belonging to the lanthanide group of the periodic table. It is relatively stable at room temperature in dry air, but it ignites when heated above 150 C and forms an oxide coating in moist air. One of the most important applications of Samarium is in samarium-cobalt magnets, which have a nominal composition of SmCo₅ or Sm₂Co₁₇. China`s decision to scrap export quotas and taxes on rare earth elements may boost stalled demand for the products. It is an opportunity for the giant manufacturers to expand production capacity and improve the company`s market share.
