The global Sand Blasting Equipment market was valued at 396.83 Million USD in 2021 and will grow with a CAGR of 3.81% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Abrasive blasting, more commonly known as sandblasting, is the operation of forcibly propelling a stream of abrasive material against a surface under high pressure to smooth a rough surface, roughen a smooth surface, shape a surface or remove surface contaminants. A pressurised fluid, typically compressed air, or a centrifugal wheel is used to propel the blasting material (often called the media). There are several variants of the process, using various media; some are highly abrasive, whereas others are milder. The most abrasive are shot blasting (with metal shot) and sandblasting (with sand). Moderately abrasive variants include glass bead blasting (with glass beads) and media blasting with ground-up plastic stock or walnut shells and corncobs. A mild version is sodablasting (with baking soda). In addition, there are alternatives that are barely abrasive or nonabrasive, such as ice blasting and dry-ice blasting. The increasing demand for sand blasting equipment drives the market. Technical advancement, lung diseases like silicosis caused by manual sand blasting operation and rapid industrialization are key drivers for sand blasting equipment market. Substitution of manual labor improve productivity and efficiency. Inhalation of silica, which has been traditionally used as an abrasive material in sand blasting machines, causes health

hazards such as silicosis and other lung diseases. Sand blasting equipment prevent contracting any lung disorders, which is thereby expected to propel market growth. Asia Pacific sandblasting machines dominated market owing to low costs and high demand for these products. China is predicted to be the major revenue contributor for APAC. Europe sandblasting machines market size is expected to increase over the forecast period, followed by North America.
