The global Satellite Bus market was valued at 848.6 Million USD in 2021 and will grow with a CAGR of 5.52% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A satellite bus or spacecraft bus is a general model on which multiple-production satellite spacecraft are often based. The bus is the infrastructure of the spacecraft, usually providing locations for the payload (typically space experiments or instruments).North America led the satellite bus market in 2017. The US government is increasingly investing in the satellite bus industry to enhance the capabilities and efficiency of satellite bus and launch vehicles. However, the satellite bus market in the Asia Pacific region is expected to grow at the highest CAGR during the forecast period. The Asia Pacific is considered a lucrative market for domestic and regional satellite bus manufacturers, and thus, the increase in the development of satellites is expected to propel the growth of the satellite bus market in this region.
