The global Scaffold market was valued at 8987.09 Million USD in 2021 and will grow with a CAGR of 4.64% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A scaffold is a temporary structure specifically erected to support access or working platforms. Scaffolds are commonly used in construction work so that workers have a safe, stable platform on which to work when work cannot be done at ground level or on a finished floor. As international economic situation is complicated, in the next few years there will be many uncertainties although. Due to the government` policy and the high sales of Scaffolding in the international market, the current demand for Scaffolding product is relatively high in the mature market, such as North America and EU, but the demand in China is relatively higher due to the downstream demand. For industry structure analysis, the Scaffolding industry is fragmented. A variety of manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. The top ten producers account for about 33.24% of the sales value. Regionally, Europe is the biggest sales value of Scaffolding, also the leader in the whole Scaffolding industry. China occupied 37.09% of the sales volume market in 2015. It is followed by Europe and North America, which respectively have around 26.26% and 23.38% of the global total industry. Other countries have a small amount of production. Although sales of Scaffolding brought a lot of opportunities, the study group

recommends the new entrants who just having money but without technical advantage and downstream support, do not to enter into the Scaffolding field hastily.
