Selective Complaint Assembly Robot Arm (SCARA) is a parallel-axis jointed robot, which is rigid at Z-axis or vertical scale. This robot can move horizontally with its joint elbow, and function like a human arm. SCARA robots are very useful for high-precision, high-speed operations, and confined workspaces. The SCARA robots market for assembling applications accounted for the majority market share and will continue to dominate the market for the next few years. The market is witnessing a high demand for SCARA robots in the assembly segment since the precision arm of SCARA robots can significantly reduce assembly times, increase production speed, and improve the quality of work.
