Abstracts

The global Scented Candles market was valued at 2432.55 Million USD in 2021 and will grow with a CAGR of 4.74% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Scented candles refer to candles that have synthetic or natural scented material blended into them to provide a pleasant smell while burning. Scented candles provide a relaxing environment as a result of the fragrances released while burning. According to the candle market statistics, the retail outlet's segment accounted for the majority market share during 2017 and will continue to dominate the market for the next few years. Some of the major factors responsible for the market segment's growth is the growing preference of consumers to see and buy the products directly from the shop and the growing number of retail outlets in developing and emerging countries such as China and India.
