The global Screen Protective Film market was valued at 35.38 Million USD in 2021 and will grow with a CAGR of 3.3% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A Screen Protective Film is a layer of protective film to avoid scratches, wear, or contamination on the screen surface of an electronic product. Now Screen Protective Films are widely used for mobile phones, tablets. Especially after the emergence of intelligent mobile phone, Screen Protective Film has been widely used. In terms of brands vendors, OtterBox, ZAGG and 3M captured the top three revenue share spots in the Screen Protective Film market in 2016. OtterBox dominated with 10.341 percent revenue share, followed by ZAGG with 10.127 percent revenue share and 3M with 4.918 percent revenue share. The prices of Screen Protective Film will continue to decline. Screen Protective Film's business competition and the gradually falling prices of Screen Protective Film raw materials prompted the Screen Protective Film prices to continue to decline. The market is not only influenced by the price, but also influenced by the product performance. The leading companies own the advantages on better performance, more abundant product's types, better technical and impeccable after-sales service. Consequently, they take the majority of the market share of high-end market. Despite the presence of competition problems, due to the clear global recovery trend, investors are still optimistic about this area, in future still more new investment will

enter into the field. Technology and cost are two major problems.
