A screen protector is a layer of protective film to avoid scratches, wear, or contamination on the screen surface of an electronic product. Now screen protectors are widely used for mobile phones, tablets, laptops, LCD TVs, handheld video game devices, cameras, GPS unit, e-book readers and other electronic items. Especially after the emergence of intelligent mobile phone, screen protector has been widely used. The prices of Screen Protector will continue to decline. Screen Protector's business competition and the gradually falling prices of Screen Protector raw materials prompted the Screen Protector prices to continue to decline.
