The global Screw Compressor market was valued at 672.49 Million USD in 2021 and will grow with a CAGR of 6.2% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A screw compressor is a type of rotary compressor which compresses air due to screw action. The main advantage of using this compressor is that it can supply compressed air continuously with minimum fluctuation in delivery pressure. Asia-Pacific is projected to dominate the global screw compressor market by 2023 and is expected to grow at the highest CAGR from 2018 to 2023. This growth is attributed to increasing industrialization, rise in energy consumption, and presence of manufacturing facilities in the region. China, India, and Southeast Asian countries are driving the screw compressor market in the Asia-Pacific region.
