The dew point is the temperature at which the water vapor in a sample of air at constant barometric pressure condenses into liquid water at the same rate at which it evaporates. At temperatures below the dew point, the rate of condensation will be greater than that of evaporation, forming more liquid water. In short, the dew point is an accurate measurement of the moisture content in the air. Screw-in Dew-point Transmitters is a devices measuring the dew point of sample gas. In the past few years from 2011-2015, global Screw-in Dew-point Transmitters industry developed fast with a 7.8%~10.8% growth rate, which is mostly driven by emerging countries, like China. In terms of manufacturers, Michell, VAISALA, CS Instruments GmbH captured the top three revenue share spots in the Screw-in Dew-point Transmitters market in 2015. Michell dominated with 22.19 percent revenue share, followed by VAISALA with 18.04 percent revenue share and CS Instruments GmbH with 9.89 percent revenue share. There is also a certain space in the Screw-in Dew-point Transmitters product demand market. So in the next five years, the Screw-in Dew-point Transmitters will continue developing rapidly. With the wide application fields, more and more investments will go into Screw-in Dew-point Transmitters industry and Screw-in Dew-point Transmitters industry has a

bright future. In the supply chain relationship of the Screw-in Dew-point Transmitters, the most important link is the raw materials and the manufacturing equipment, the raw materials and the manufacturing equipment directly determine the cost of the Screw-in Dew-point Transmitters, and the equipment is an important part of quality assurance, these two parts are also the concerns of the Screw-in Dew-point Transmitters manufacturer. In the end market, the Screw-in Dew-point Transmitters consumption is dependent on the development of the downstream industries, expand the consumption market and develop the new consumer are the most important factors of the Screw-in Dew-point Transmitters marketing. In China, the high-end Screw-in Dew-point Transmitters products mainly rely on import from foreign developed countries, like US, UK. To meet the large demand for the high-end products, Chinese manufacturers will invest much more on the R&D, which will certainly weaken the dependence of imports. Global Screw-in Dew-point Transmitters industry is both concentrated and fragmented because of the diversity of technologies. In the future, since the industry is technology oriented, market position of leading players is likely to be governed by novel product launches.
