The global Scroll Compressors market was valued at 5951.33 Million USD in 2021 and will grow with a CAGR of 3.8% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A scroll compressor (also called spiral compressor, scroll pump and scroll vacuum pump) is a type of (usually) oil-free orbiting displacement compressor, i.e. it compresses a specific amount of air into a continuously decreasing volume. The compressor element consists of a stator spiral fixed in a housing and a motor-driven eccentric, orbiting spiral. The spirals are mounted with 180° phase displacement to form air pockets with a gradually varying volume. This provides the scroll elements with radial stability. Leakage is minimized because the pressure difference in the air pockets is lower than the pressure difference between the inlet and the outlet. The orbiting spiral is driven by a short-stroke crankshaft and runs eccentrically around the center of the fixed spiral. The inlet is situated at the top of the element housing. It is used in Air Conditioning equipment, as an automobile supercharger (where it is known as a scroll-type supercharger) and as a vacuum pump. Many Air Conditioning central Heat Pump and Air Conditioning systems and a few automotive Air Conditioning systems employ a scroll compressor instead of the more traditional rotary, reciprocating, and wobble-plate compressors. Emerson, Aotecar, Panasonic, Daikin, Hitachi, Samsung, Mitsubishi, Electric, LG, Danfoss etc. are the key players in the global Scroll Compressors market.

Top 5 players have a share over more than 40% in 2019. Emerson, Aotecar, Panasonic etc. which have leading technology and market position, are well-known players around the world. From the view of region, Asia-Pacific have a larger market share in 2019 which account for 40% and will witness a stable growth in following years. North America hold a market share of 24 % will still play an important role which cannot be ignored. Europe share a 22% market share in 2019, might affect the development trend of Scroll Compressors. Air Conditioning is the largest application, holds a market share of 43%, followed by the Refrigeration which account for 43%, and the remaining share is held by the Heat Pump.
