The global Security Robots market was valued at 125.75 Million USD in 2021 and will grow with a CAGR of 9.26% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Security robots are mobile robots that can be autonomous in operations or remotely operated. These robots assist defense and police officials in carrying out their day-to-day activities. These robots are mainly used in unmanned transportation and defense operations, such as border patrolling and bomb detection, thus reducing the risk to human life. North America held the largest share of the global security robots market in 2017; it is expected to hold the largest share of the global security robots market between 2018 and 2023. The security robots market in APAC is expected to grow at the highest CAGR between 2018 and 2023. Increased investments for strengthening the surveillance and weapon guidance capabilities by China, India, and Japan, and rise in spending of governments to tackle terrorist attacks, infiltration, illegal immigration, and criminal activities are driving the growth of the market in APAC.
