A self-contained breathing apparatus, or SCBA, sometimes referred to as a compressed air breathing apparatus (CABA), or simply breathing apparatus (BA), is a device worn by rescue workers, firefighters, and others to provide breathable air in an immediately dangerous to life or health atmosphere (IDLH). When not used underwater, they are sometimes called industrial breathing sets. The term self-contained means that the breathing set is not dependent on a remote supply (e.g., through a long hose). If designed for use under water, it is called SCUBA (self-contained underwater breathing apparatus).The classification of self-contained breathing apparatus (SCBA) includes open-circuit SCBA and closed-circuit SCBA, and the proportion of open-circuit SCBA in 2017 is about 62%, and the proportion is in decreasing trend from 2013 to 2017. Self-contained breathing apparatus (SCBA) is widely used in fire fighting, industrial use and other field. The most proportion of self-contained breathing apparatus (SCBA) is used in fire fighting, and the sales proportion in 2017 is about 58%. North America is the largest consumption place, with a consumption market share nearly 41% in 2017. Following North America, Europe is the second largest consumption place with the consumption market share of 27%.
