Semiconductor Laser Therapeutic Equipment is equipment that uses a semiconductor laser as a medium to stimulate therapeutic instrument. Each excitation, The electron atoms pumped to a higher energy level, the energy level in the original leave a hole, and then the electron and hole coincide with the same model inspire other electronics to obtain an amplified coherent single wavelength of light, for the treatment of diseases. Semiconductor Laser Therapeutic Equipment of low-intensity laser irradiation of blood can trigger a series of biochemical reactions the body, improve and restore physiological function of blood through both the role of promoting blood circulation and static blood. Semiconductor Laser Therapeutic Equipment is one of the saturation Products in recent years in China. But China is still the largest demand in the world. Accelerated economic development, people's living standards improve, gradually aging population, demand for healthcare services to upgrade and promote the health care spending growth and demand for medical devices. To increase sales of semiconductor laser treatment provides new impetus As Semiconductor Laser Therapeutic Equipment Price decreases. Mainly because the prices of raw materials declined, particularly as mature, the cost of technology laser technology is gradually reduced. Technology

barrier is not a key factor as main parts of Semiconductor Laser Therapeutic Equipment nearly depends on importing. In China average industry gross margin is between 20% and 30%, that is to say, Semiconductor Laser Therapeutic Equipment Project is saturation.
