The global Semiconductor Packaging and Assembly Equipment market was valued at 2606.91 Million USD in 2021 and will grow with a CAGR of 6.06% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

For an integrated chip (IC) to function, it needs to be connected to the package or connected directly to the printed circuit. This involves dicing, wire bonding, and die bonding. This entire process is known as semiconductor packaging and assembly, which is the back-end process of chip formation. The die-level packaging and assembly equipment segment to be the major revenue contributing segment in this market during the forecasted period.
