Shooting ranges, also known as firing ranges, are specialized facilities that are designed for training military personnel on the use of firearms. There are indoor and outdoor types of ranges. They are restricted to certain types of firearms such as handguns and rifles. Training and simulation at the shooting ranges improve the agility and combat skills of soldiers and defense personnel, making them ready for a real-time battleground. In 2017, the global indoor shooting range market is estimated to be dominated by Europe and the global outdoor shooting range market is estimated to be dominated by North America. A number of factors such as high defense spending have led to growth in the shooting ranges market in North American countries.
