The global Shot Blasting Machines market was valued at 41.04 Million USD in 2021 and will grow with a CAGR of 1.5% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Shot Blasting Machine is equipment that used to clean, strengthen (peen) or polish metal. Shot blasting machine is used in almost every industry that uses metal, including aerospace, automotive, foundry, shipbuilding, rail, and many others. As international economic situation is complicated, in the next few years there will be many uncertainties. Due to the government` policy and the high sales of Shot Blasting Machines in the international market, the current demand for Shot Blasting Machines product is relatively stable in the mature market, such as North America and Europe, but the demand in China is relatively higher due to the downstream demand. Shot Blasting Machines is mainly manufactured and sold by Wheelabrator, Rosler, Sinto, Pangborn; and these companies occupied about 15.19% market share in 2015. Geographically, China is the largest sales market in the world, which took about 35.16 percent of the global consumption volume in 2015. But Europe shared 32.13% of global total sales revenue. Although sales of Shot Blasting Machines brought a lot of opportunities, the study group recommends the new entrants who just having money but without technical advantage and downstream support, do not to enter into the Shot Blasting Machines field hastily.
