The global Shot Peening Machine market was valued at 37.58 Million USD in 2021 and will grow with a CAGR of 1.3% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Shot peening is a cold working process used to produce a compressive residual stress layer and modify mechanical properties of metals and composites. It entails impacting a surface with shot (round metallic, glass, or ceramic particles) with force sufficient to create plastic deformation. As international economic situation is complicated, in the next few years there will be many uncertainties. Due to the government` policy and the high sales of Shot Peening Machines in the international market, the current demand for Shot Peening Machines product is relatively stable in the mature market, such as North America and Europe, but the demand in China is relatively higher due to the downstream demand. Shot Peening Machines is mainly manufactured and sold by Wheelabrator, Rosler, Agtos, Sinto Pangborn; and these companies occupied about 64.57% market share in 2017. Geographically, Asia-pacific is the largest sales market in the world, which took about 51.82 percent of the global consumption volume in 2017. But Europe shared 38.73% of global total revenue.
