The global Silica Antiblock Additives market was valued at 376.72 Million USD in 2021 and will grow with a CAGR of 5.64% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Silica Antiblock Additive is a kind of inorganic anti-blocks, because of the sub-micro size and large BET of silicon dioxide, it can act as interval material between the granules of powder, at the same time; it also can improve the free flow of powder. Its water reducing feature can promote sorption and to prevent caking. The Silica Antiblock Additives market covers Natural Silica, Synthetic Silica, etc. The typical players include Evonik, WR Grace, PQ Corporation, Madhu Silica, Solvay, etc. Geographically, APAC is the fastest-growing region, especially China, which plays a more important role in the world. Global silica antiblock additives consumption is driven by Chinese demand, which accounted for nearly 24.5% of world consumption in 2019. Chinese silica antiblock additives demand represents robust growth, whereas the United States is a mature market. The United States is characterized by increased supply in the global environment, While China continues to drive Northeast Asian demand for the product. Because of the sub-micro size and large BET of silicon dioxide, it can act as interval material between the granules of powder, at the same time; it also can improve the free flow of powder. Its water reducing feature can promote sorption and to prevent caking. Based on application, Silica Antiblock Additives in mainly used in plastic

films. The vast majority of film is polyethylene (PE) and polypropylene (PP). In 2019, PE Films occupied the main market share of the consumer, accounting for 70.82%, followed by PP films, with 12.13% market share. From the perspective of product sources, Silica Antiblock Additives can be divided into Natural Silica and Synthetic Silica antiblock additives.
