Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

A silicon anode battery is a type of lithium ion (Li-Ion) battery where the anode is replaced by silicon nanotubes or silicon coating. The idea of using a silicon anode in a battery is still under a lot of testing. This has multiple advantages over ordinary lithium or graphite anodes. The silicon enables long life and high energy storage, resulting in a significantly longer lasting battery. Based on geography, North America accounted for the largest share of the silicon anode battery market in 2017. The market in Asia-Pacific is expected to grow at the highest CAGR, owing to substantial investments by various companies to set up their silicon anode battery-manufacturing facilities in several countries across in the region.
