The global Silicon Carbide Ceramics market was valued at 617.13 Million USD in 2021 and will grow with a CAGR of 2.9% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Silicon Carbide has properties remarkably similar to those of diamond - it is one of the lightest, hardest, and strongest technical ceramic materials and has exceptional thermal conductivity, resistance to acids, and low thermal expansion. Silicon Carbide is an excellent material to use when physical wear is an important consideration because it exhibits good erosion and abrasive resistance, making it useful in a variety of applications such as spray nozzles, shot blast nozzles and cyclone components. The consumption of silicon carbide ceramics mainly concentrates in North America, Europe and Asia-Pacific. Asia-Pacific is the largest consumer, which accounted for about 2/5 in 2019. Europe and North America are the followers, with the share of nearly 29% and 24% respectively. Saint Gobain, Ceramtec, 3M, IBIDEN, Kyocera are the leading manufacturers of the world, these companies occupied 45% of the market in 2019. Among various applications, demand from machinery manufacturing accounts for the largest share with about 31% in 2019 globally. Reaction Bonded Silicon Carbide is the major process in manufacturing of silicon carbide ceramics, which takes share of about 58% of global market in 2019.
