Silicon Gases refer to the silane gas that is the principal material used in the production of polysilicon semiconductors and LCD display manufacturing. Silicon Gases are packaged for sale and distribution to end use markets for flat panel displays, semiconductor, and solar applications. The transportation and subcontracting of silicon gases requires high security measures, so many manufacturers do not sell silicon gases directly. Industrial gas manufacturers such as The Linde Group, Praxair, Air Liquide and Air Products & Chemicals are major distributors in this market. Industrial gas manufacturers also claim that they occupy a large market share, but most of these are not direct manufacturers.
