The global Silicon Nitride Ceramic Substrate market was valued at 88.64 Million USD in 2021 and will grow with a CAGR of 2.16% from 2021 to 2027, based on HNY Research newly published report.

The prime objective of this report is to provide the insights on the post COVID-19 impact which will help market players in this field evaluate their business approaches. Also, this report covers market segmentation by major market vendors, types, applications/end users and geography(North America, East Asia, Europe, South Asia, Southeast Asia, Middle East, Africa, Oceania, South America).

Silicon nitride ceramic substrate is a physical material that made of silicon nitride, upon which a semiconductor device, a photovoltaic cell or an integrated circuit, is applied. Silicon nitride with high thermal conductivity has emerged as one of the most promising substrate materials for the next-generation power devices. Globally, silicon nitride ceramic substrate producers are concentrated in Asia, with Japan produce and consume a majority share of products. Germany is also leading supplier of silicon nitride ceramic substrate. In 2016, the production market share of Japan, China, USA and Europe are 59%, 3%, 9% and 23% separately. Silicon nitride ceramic substrate is a concentrated industry with several companies dominates the market. Leading players in silicon nitride substrate industry are Toshiba Materials, Rogers, Kyocera, MARUWA, Coors Tek, Denka, Tomley Hi-tech, etc. In 2016, the production volume of the top four producers accounted for 67% of the whole market. The material of silicon nitride ceramic substrate is mainly silicon nitride powder. Since Silicon Nitride ceramic substrate is a niche market, the influence of raw material is not the primary factor that affects the price. Technical expenses, relationship with downstream users are more essential to the market. The largest consumption area of silicon nitride ceramic

substrate is power module, which accounted for 58% of world silicon nitride ceramic substrate consumption in 2016. Heat sinks, LED and wireless modules are also important applications of silicon nitride ceramic substrate. The global silicon nitride ceramic substrate production volume will increase to 302 M Sq.cm in 2022, from 249 M Sq.cm in 2016. It is estimated that the global silicon nitride ceramic substrate demand will develop with an average growth rate of around 3.29% in the coming five years.
